Mark Devin Denosta.

PHP / SYMFONY ENGINEER

Mandaue, Central Visayas, PH · dmarkdevin@gmail.com · linkedin.com/in/dmarkdevin

Senior PHP & Symfony engineer with 10+ years turning messy business problems into reliable, maintainable software. I specialise in the backend — database architecture, clean REST APIs, and the third-party integrations businesses run on — owning features end to end and keeping long-running production codebases healthy. Experienced delivering remotely for international teams across Australia, Singapore and the Philippines.

EXPERIENCE

PHP / Symfony Developer
Feb 2018 — Present

Cloudesk Pty Ltd — building Appyfic · Greater Sydney Area (Remote)

- Ship product features end to end across backend services, REST APIs and the interfaces on top.
- Evolve and maintain a long-running production codebase without regressions.
- Design data models and APIs that downstream features and integrations depend on.

Website / PHP Developer
Feb 2018 — Feb 2024

PureGold.sg Pte Ltd — Singapore (Remote)

- Built and maintained PHP web applications for a Singapore-based business.
- Owned hosting and server-side operations alongside feature development.

Web Developer & Network Administrator
Jul 2016 — Mar 2022

Central Visayas Information Sharing Network Foundation Inc. — Cebu City, PH

- Delivered web applications while administering network and hosting infrastructure.
- Kept the foundation's systems available and maintainable across multiple years.

IT Support Staff
Jul 2014 — Dec 2021

Central Visayas Information Sharing Network Foundation Inc. — Philippines

Provided IT support across the foundation's day-to-day operations.

Student Assistant — MIS Office
Jun 2010 — Mar 2014

Naval State University — Management Information System Office

Supported the university's MIS office while completing the Computer Science degree.
